DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 29 is rejected under 35 U.S.C. 102(b) as being anticipated by Kwak et al.(6,411,600).

With regards to claim 26 Kwak teaches a method of failure notification comprising:

Providing a communication network having at least two overlapping areas nodes interconnected by communication links(Fig. 3protection domains I, II), upon a failure event involving one of the communications link(Fig. 3@c), broadcasting a failure message identifying the failed link(AIS cell), the broadcast being confined within the areas which includes the failed link;(node adjacent to link detects the AIS, protected domain I), establishing a working path which traverses one or more areas of nodes, the working

path comprises a series of links(Fig. 3, working path, links 1, 6, 7, 10, 11, 12, 13), for each area through which the working path traverses, pre-calculating an associated protection path comprising a different series of links;(Fig. 3, protection paths in protection domain I, II are predetermined), if the working path includes the failed link , switching the working path to the associated protection path for one of the areas that includes the failed link.(protection switch).

Allowable Subject Matter

Claims 1-6, 10-11, 15-16, 20-28 allowed.
